About Me

Hi, I'm Josesdio a Computer Science student at Binus University, currently in my seventh semester, with a focus on Mobile Application and Technology. I'm passionate about building user-friendly mobile solutions that make a real difference in people's lives.

Skills

- JavaScript
- Laravel
- ReactJs
- TailwindCss
- PHP
- JQuery
- HTML5
- Swift, Dart, and Flutter

Education

Bachelor of Computer Science

Binus University

2021 - Present

I am currently pursuing a Bachelor of Computer Science degree at Binus University with expected graduation in 2025. Throughout my studies, I have built a strong foundation in core computer science principles, including algorithms, data structures, software development, and system design. I have gained hands-on experience in programming languages such as JavaScript, PHP, Dart, Swift, HTML, TailwindCSS. In addition to my coursework, I have worked on various projects that have enhanced my problem-solving skills and logical thinking, with a focus on web development. I am eager to continue developing my skills through real-world applications and industry experiences.

Experience

FLIX Re-Design

PT. Admin Pintar Kita

May 2024

I contributed to the Flix re-design project, focusing on developing a modern user interface using Next.js. My tasks included improving performance, implementing responsive design, and optimizing the user experience. I worked with a team to integrate features like dynamic content loading and smooth navigation.

Mimin Company Profile

PT. Admin Pintar Kita

June 2024

I contributed to the development of Mimin Company Profile using Laravel for backend development and MySQL for database management. My tasks included building features, optimizing the database, and ensuring smooth and efficient performance of the application.

Mimin Website Revamp

PT. Admin Pintar Kita

October 2024

I was involved in the Mimin Website Revamp, where I used Next.js for development and Tailwind CSS for styling. My responsibilities included building a responsive and modern website design, optimizing performance, and ensuring a seamless user experience across different devices.

Mimin Order Management System

PT. Admin Pintar Kita

Februari 2024 -Present

I worked as a frontend developer on the Mimin Order Management System website, which consisted of multiple websites for different clients, including Flimty, Wellings, Solo Pizza, Flix, and others. Using Laravel, CSS, and Bootstrap, I built and optimized the user interface for each client, ensuring a seamless experience and maintaining consistent design across all platforms.
